

DIABETES CARE PROGRAM OF NOVA SCOTIA 2022-2027 ACTION PLAN

Vision

Working together, we support Nova Scotians living with, affected by, or at risk of developing diabetes to live their healthiest life.

The Action Plan aligns with the integrated wellness and chronic disease prevention and management strategy for Nova Scotia.

- ✓ Self-Management
- ✓ Wellness, Screening and Risk Factor Prevention
- ✓ Optimize Care
- ✓ Integrated, Coordinated and Responsive System

Diabetes in Nova Scotia*

- Approximately 121,000 people have been diagnosed with diabetes in Nova Scotia, representing 12% of the province's population.
- With diabetes, undiagnosed diabetes and prediabetes combined, an estimated 335,000 people in N.S. (33% of the provincial population) are affected. By 2032, it will increase to 367,000 people (36% of the provincial population).
