

Primary Health Care Practice Support

Tailored practice-level support to improve provider and patient experience, enhance access to care, and strengthen Nova Scotia's health homes and health neighborhoods

Practice Support helps primary care providers and teams optimize the way care is delivered, allowing busy teams time to focus on what they do best – deliver care. Primary Health Care Practice Support helps teams achieve evidence-based pillars of health homes:

Optimizing Digital Health/EMR

Assisting your teams with the use of **digital health/EMR systems**

Building a Healthy Practice/Team

Facilitating **team-based approaches to patient-centred care**

Knowing Your Patient Panel

Helping your teams **optimize the use of patient/client rosters** to proactively support patient care needs

Improving Clinic Flow and Efficiency

Facilitating **efficient processes to improve the flow** of patients and information

Enhancing Access and Continuity

Supporting improvements to increase how and when your patients can receive **timely access to care**
