

# Documenting Seasonal Influenza Administration in MedAccess

To ensure immunizations are shared electronically with Public Health and accessible to your patients in VaxRecordNS/YourHealthNS, please follow the instructions below. MedAccess users **MUST** use the "**Immunization – Panorama (NS)**" Observation Template. This template can be copied and renamed as needed, but it must be used to continue sharing records with Public Health. Please do not copy other templates or create a new template from scratch.

## Load the Immunization - Panorama (NS) template:

1. Open your patient's Visit
2. In the Plan section select > Imm > \*Immunization – Panorama (NS)

**TIP:** Make the template a favorite to display in Imms icon

## Complete the template. Key fields:

1. Select vaccine Influenza-quad as the **Immunizing Agent**
2. Select the **Manufacturer** (known as Trade Name for Public Health)
3. Enter **Lot #** (do not enter expiry with lot#)
4. Enter **Expiry Day, Month & Year**
5. Enter **Route**
6. Enter **Injection Site**
7. Enter **Dose** (do not enter unit of measure with dose)
8. Select **Dose Unit of Measure**

**NOTE:** Public health does not receive data from the Dose in series and Physician notes

**Panorama Immunization Extract**

Patient did not receive vaccine at this location
