

Documenting RSV Immunizations in Med Access

To ensure immunizations are shared electronically with Public Health and accessible to your patients in VaxRecordNS/YourHealthNS, please follow the instructions below. Med Access users **MUST** use the "**Immunization – Panorama (NS)**" Observation Template. This template can be copied and renamed as needed, but it must be used to continue sharing records with Public Health. Please do not copy other templates or create a new template from scratch.

Load the Immunization - Panorama (NS) template:

1. Open your patient's Visit
2. In the **Plan** section select > **Imm** > ***Immunization – Panorama (NS)**

TIP: Make the template a favourite

Infant Immunizations: Please document **nirsevimab, Beyfortus** in the template based on the table below.

Vaccine Antigen	Immunizing Agent	Trade Name (Manufacturer/Drug Name)
Respiratory Syncytial Virus Monoclonal Antibody	RSVAb	Beyfortus 50 mg/0.5 ml
Respiratory Syncytial Virus Monoclonal Antibody	RSVAb	Beyfortus 100 mg/1 ml

- A single dose of nirsevimab is administered to infants. Those weighing less than 5 kg should receive a 0.5 mL dose (50 mg/0.5 mL) and those weighing 5 kg or more should receive a 1 mL dose (100 mg/1 mL).
- For a second RSV season, nirsevimab is given as a single dose of 200 mg (2 x 100 mg/1 mL). However, if the child weighs less than 10 kg, a single dose of 100 mg may be considered at clinical discretion.

Complete the template. Key fields:

1. Select vaccine **RSVAb** as the **Immunizing Agent**
2. Select **Beyfortus 50 mg/0.5 ml OR Beyfortus 100 mg/ 1 ml** as the **Manufacturer** (Trade Name for Public Health)
3. Enter **Lot #** (do not enter expiry with lot#)
4. Enter **Expiry Day, Month & Year**
5. Enter **Route**
6. Enter **Injection Site**
7. Enter **Dose** (do not enter unit of measure with dose)
8. Select **Dose Unit of Measure**
9. Enter **Immunization Reason**
