Substance Use Health and Trauma Informed Care Practice Support Program

Become a Physician Champion

The **Substance Use Health and Trauma Informed Care Practice Support Program** is expanding its training and resources to strengthen how primary care teams support patients across the spectrum of substance use. We are actively recruiting physicians who are passionate about reducing stigma, promoting substance use screening and early intervention, and embedding trauma informed practices into everyday care.

Physician Champions will have the opportunity to collaborate in developing and co-facilitating training, mentoring peers, and promoting program resources within their networks.

Your Opportunity as a Physician Champion

We are seeking people who are passionate about:

- Reducing stigma in primary care
- Supporting substance use screening and early intervention
- Embedding trauma informed practices into care

As a Physician Champion, you will:

- Help develop and co-facilitate training for colleagues
- Provide coaching and mentorship opportunities
- Promote new resources and practice supports in your networks
- Influence how primary care supports patients across the substance use spectrum

The Substance Use Health & Trauma Informed Care Practice Support equips family physicians and primary health care providers with practical skills to reduce stigma, support patients across the spectrum of substance use, and embed trauma informed approaches into everyday practice.
